

**EuLab  
TEC**

European Laboratory on Training  
Education and Citizenship

# EuLabTEC

A new way to communicate Europe!

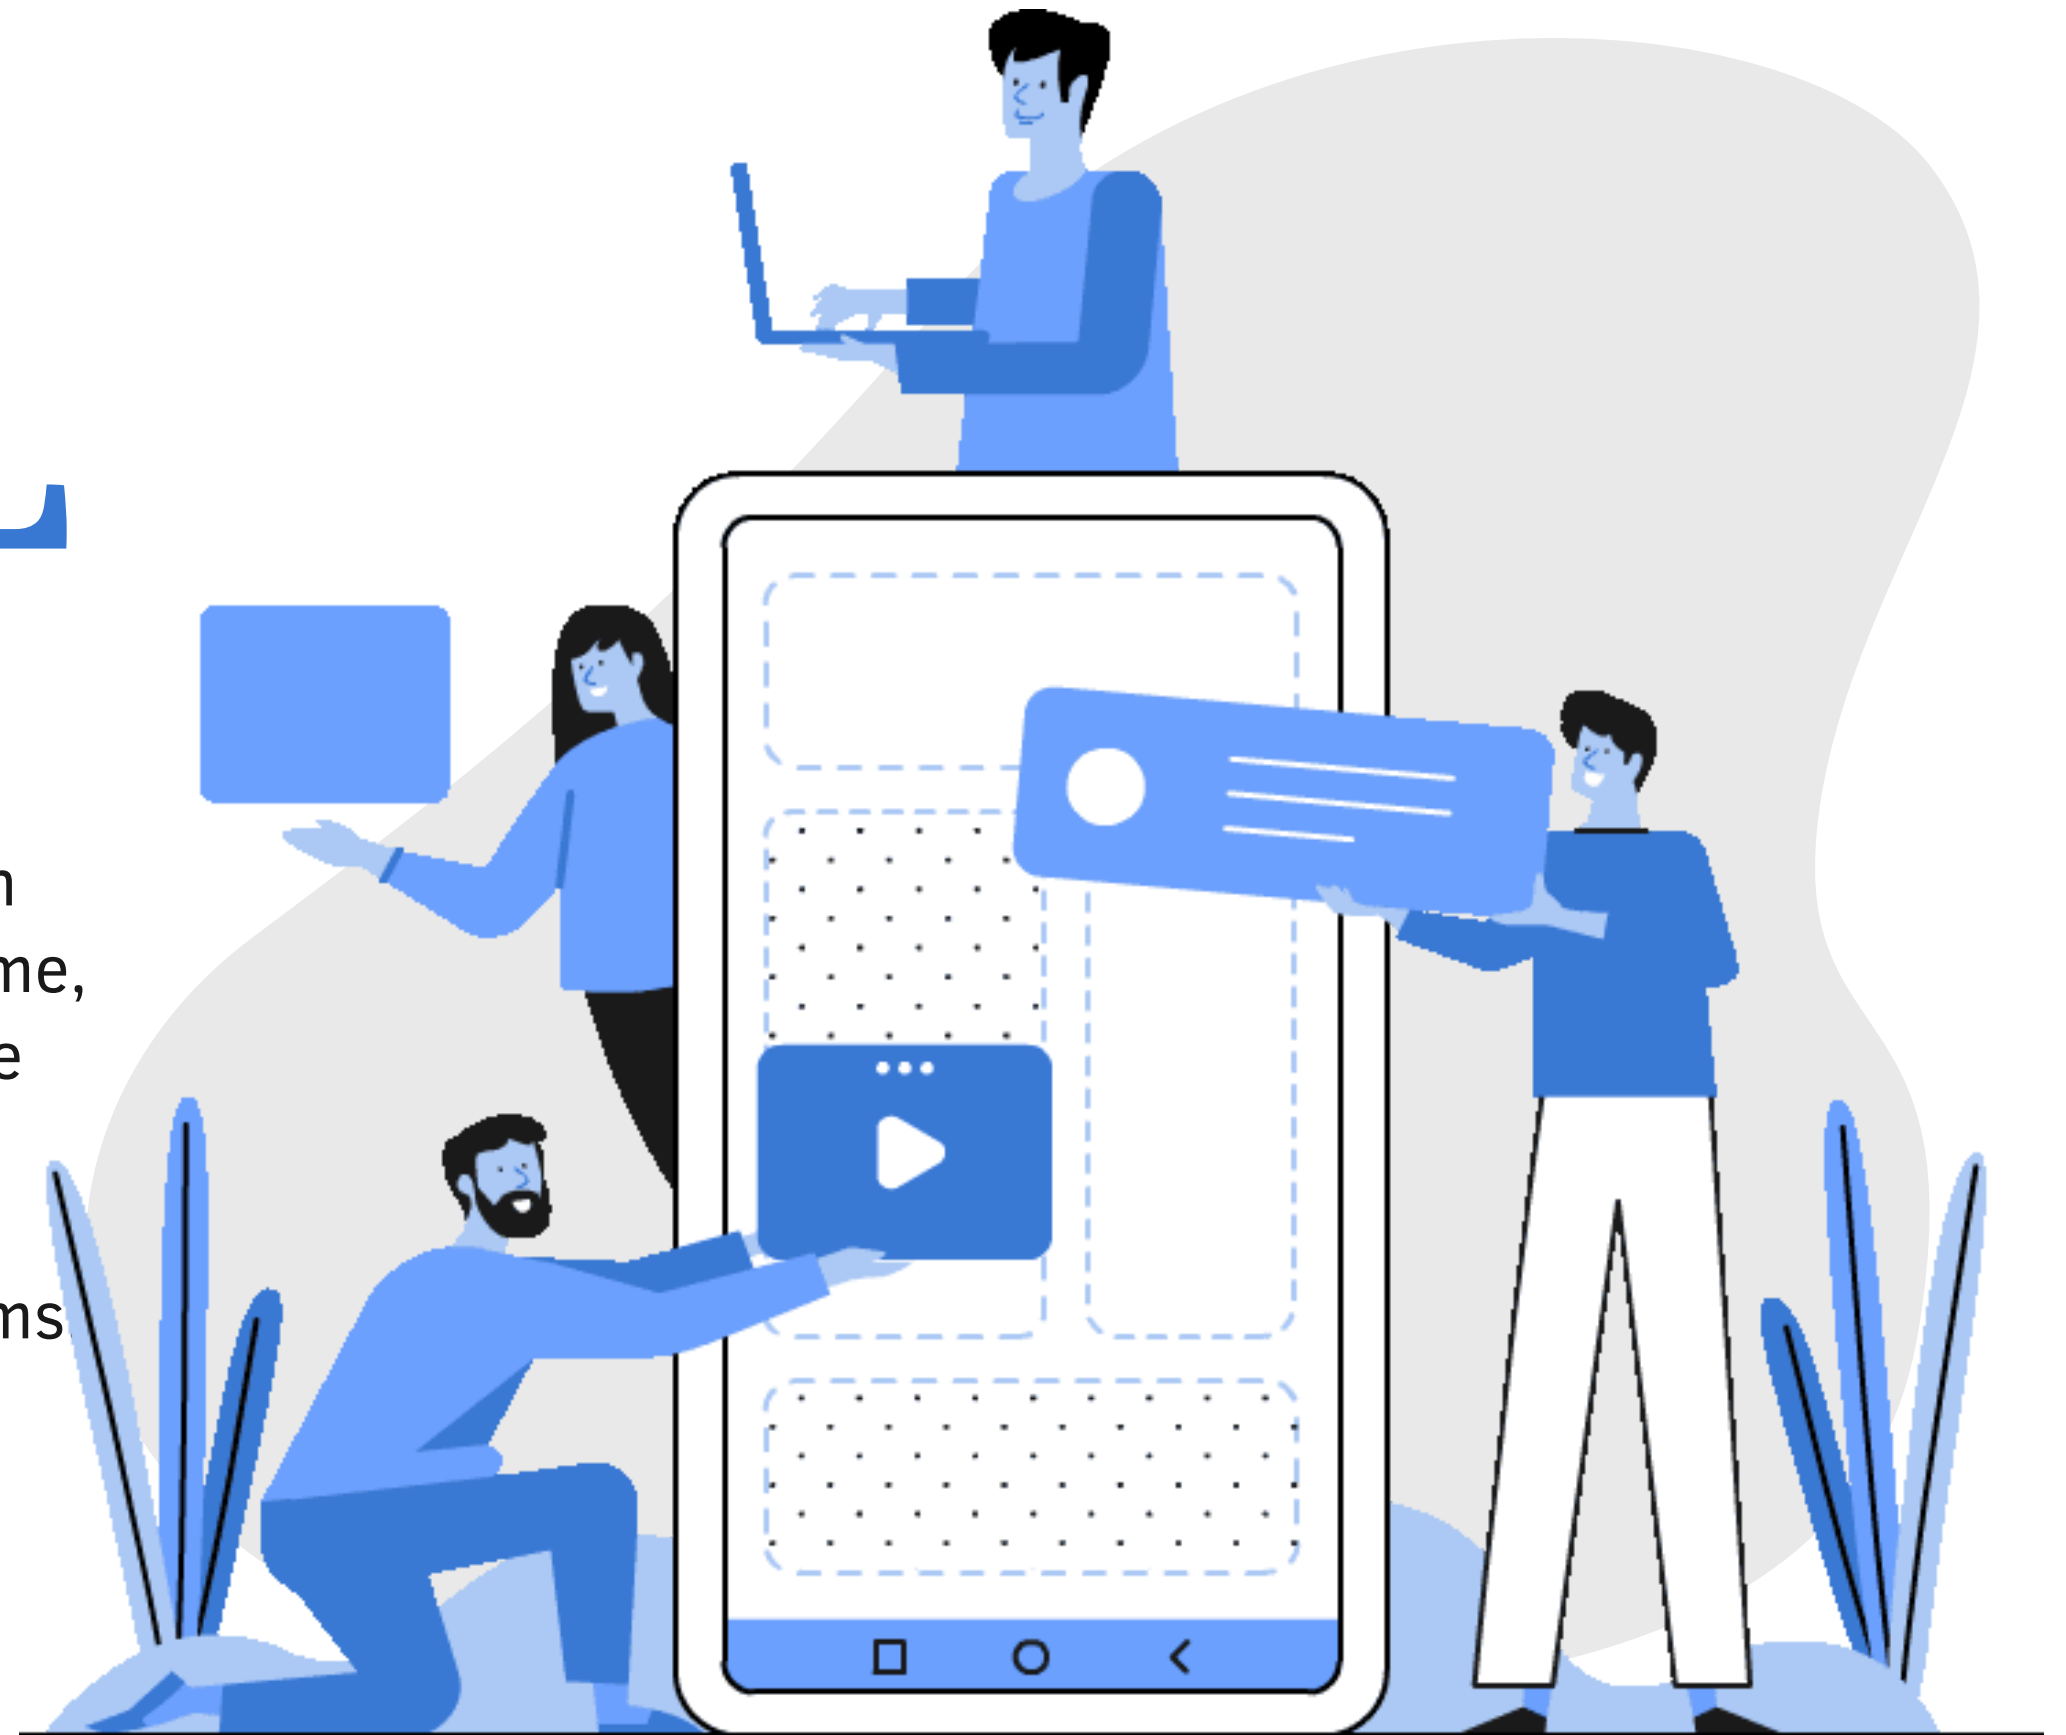

# Communicating the European Values

European Laboratory on Training, Education and Citizenship is a Think Tank, a Laboratory and also a Project Incubator, where every idea is supported and guided to transform itself into the vision of Europe we would like! traditional forms of media need an upgrade

# DIGITAL

EULABTEC is the first European digital association. Although its registered office is in Aprilia, a city in the Agro Pontino south of Rome, land on the Island of Ventotene, where Europe was born, the Association is everywhere through digital think tanks, creating debate rooms and sharing on different online platforms. This allows its radical contamination with different ideas and cultures.

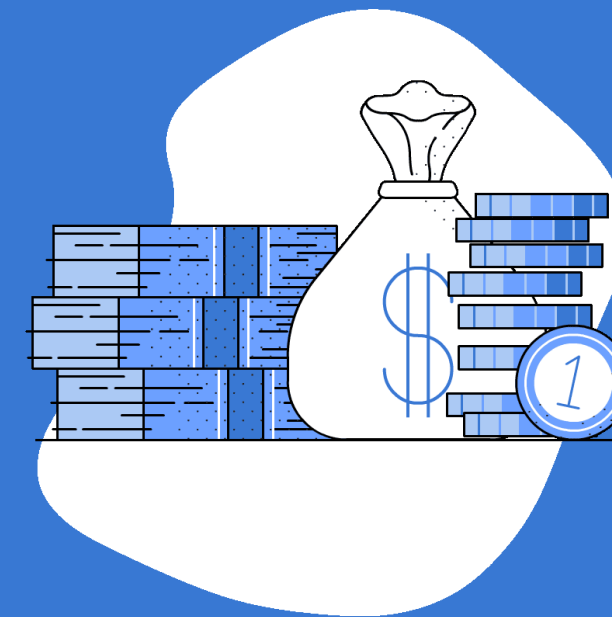

# Our Activities

Information and  
Engagement

Training and  
Dissemination

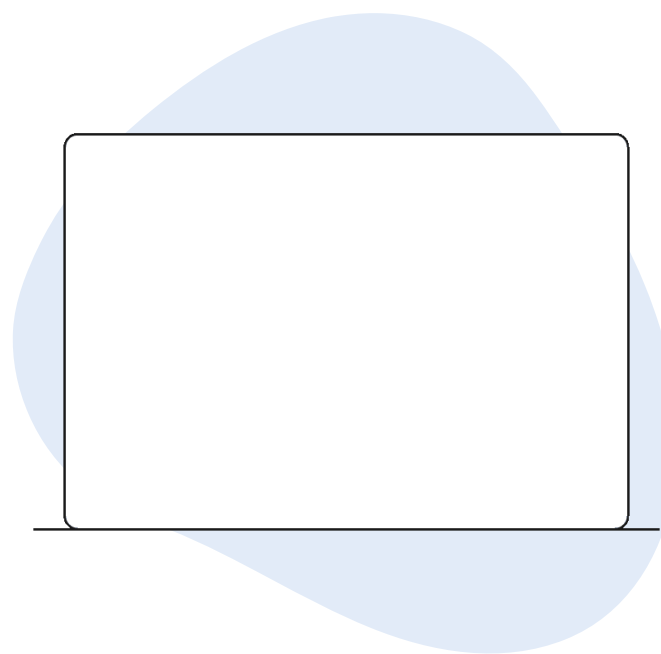

Management of EU  
Project Funded

# Our Strengths

Constant  
Innovation

Years of  
Experience

Affordable Quality  
Service

# Target

Thanks to our digital presence, we mainly refer to young people, with whom we talk and support them in the growth of their ideas. Furthermore, we pay particular attention to the education of adults, of the disadvantaged, who can find a common home in Europe!
